

Scott VandenToorn

Senior Software Engineer

Ormond Beach, FL | (616) 667-7267 | svandentoorn@gmail.com | [LinkedIn](#) | www.scottv.dev

Summary

Accomplished software engineer with 7+ years of experience crafting robust full-stack web and native applications. Background in modernizing legacy systems, Angular, .NET, CI/CD, and building AI-powered platforms on AWS. Certified AWS AI Practitioner and AWS Cloud Practitioner.

Technical Skills

Frontend: Angular, React, Vue, TypeScript, JavaScript, Capacitor, Webpack, Vite

Backend: .NET 8, C#, Delphi, REST APIs, SQL Server

Cloud & Infrastructure: AWS, Terraform, Terragrunt, CI/CD, Jenkins, Windows Server, PowerShell, Bash, Python

Tools & Methods: SAgile, Jira, GitLab, GitHub, Bitbucket, Unit Testing, A11y Expert

Experience

Senior Software Engineer — TSPI (April 2024–Present | Remote)

nxtStudio (April 2026–Present)

- Engineer on nxtStudio, an AI document intelligence platform that analyzes government solicitations and generates draft content using local (Ollama) and cloud (AWS Bedrock) LLMs.
- Maintain a 25-module Terraform and Terragrunt library deploying isolated client environments (ECS Fargate, GPU-backed LLM servers, end-to-end TLS) to AWS GovCloud, including production for city government customers.
- Drove security hardening across all environments: reusable Terraform modules for WAF, CloudTrail, GuardDuty, Security Hub, and AWS Config; automated OS patching cut vulnerability findings from ~600 to single digits.

USDA Farmers.gov (April 2024–Present)

- Led the full modernization of the USDA Receipt for Service application, migrating legacy ASP.NET Web Forms to an Angular SPA on AWS S3 with .NET 8 APIs on AWS Lambda.
- Developed a check-in kiosk for USDA Farm Service Agencies, improving tracking across 2,300 offices nationwide.
- Subject matter expert in accessibility, guided multiple teams in meeting Section 508 compliance.
- Go-to Angular expert, directed multiple teams in architecture decisions.
- Automated deployments by implementing Jenkins CI/CD pipelines.
- Cultivated talent by mentoring junior developers through technical guidance and code reviews.

Full Stack Engineer — Volgistics, Inc. (June 2019–March 2024 | Byron Center, MI)

- Developed Volgistics' first Angular application, migrating from Delphi + JavaScript to Angular with Delphi APIs.
- Pioneered entry into the mobile market by developing native iOS and Android applications via Capacitor, expanding product reach to the App Store and Play Store.
- Significantly reduced IT workload by automating 'one-click' deployments via GitLab runners.
- Automated legacy migration with Python: 8,000+ legacy MantisBT issues to GitLab and 700+ pages of help documentation to VuePress.

Prior: Full Stack Intern at DornerWorks (Angular on Rails); C Programming Tutor at GVSU Tutoring Center.

Education & Certifications

BS, Computer Engineering — Grand Valley State University, 2020

AWS Certified AI Practitioner | AWS Certified Cloud Practitioner | SAgile Practitioner
